

Product overview black

Product name	Carrier	Speciality
PreMB 22001	PET	Premium quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 1 den onwards and fine sheetings / films Food compliant according to European standard 2002/72/EC
PreMB 22601	PET	Premium quality masterbatch - top solution for any kinds of food application For fibers / filaments from 1 den onwards and fine sheetings / films Food compliant according to American FDA standard
PreMB 22701	PET	Premium quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 1 den onwards and fine sheetings / films Super extra low abrasion
PreMB 22401	PET	High quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 3 den onwards and sheetings / films
PreMB 28401	PET	High quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 3 den onwards and sheetings / films
PreMB 22801	PET	High quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 3 den onwards and sheetings / films
PreMB 28801	PET	High quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 3 den onwards and sheetings / films
PreMB 23001	PBT	Premium quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 1 den onwards and fine sheetings / films Food compliant according to European standard 2002/72/EC
PreMB 23701	PBT	Premium quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 1 den onwards and fine sheetings / films Super extra low abrasion
PreMB 23401	PBT	High quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 3 den onwards and sheetings / films
PreMB 23801	PBT	High quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 3 den onwards and sheetings / films
PreMB 41001	PA	Premium quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 1 den onwards and fine sheetings / films
PreMB 41401	PA	High quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 3 den onwards and sheetings / films
PreMB 41801	PA	High quality masterbatch Variable usage for all different kinds of applications For fibers / filaments from 3 den onwards and sheetings / films
PreMB 51001 (with 30% or 40% carbon black content)	PP	Premium quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 1 den onwards and fine sheetings / films
PreMB 51401 (with 30% or 40% carbon black content)	PP	High quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 3 den onwards and sheetings / films
PreMB 51801 (with 30% or 40% carbon black content)	PP	High quality masterbatch - variable usage for all different kinds of applications For fibers / filaments from 3 den onwards and sheetings / films
PreMB 31401	PO	Quality masterbatch Variable usage for all different kinds of applications For fibers / filaments from 3 den onwards and sheetings / films
PreMB 31801	PO	Quality masterbatch Variable usage for all different kinds of applications For fibers / filaments from 3 den onwards and sheetings / films
