IMAGINE A PERFECT SOLUTION «

Hook and loop fasteners are often invisible but they are always an indispensable fastening solution. It is the silent strength in thousands of everyday articles.

Alfatex Companies develop hook and loop fasteners for a huge variety of industrial applications. They range from bespoke straps for bandages to customised solutions for the automotive industry. We distinguish between three market segments; Medical, Automotive and Industry. These three sectors attach great value to the quality of our range of products. Since June 2015 is AlfateX Companies a part of Velcro Companies.

Our range includes more than 40,000 products. Many are available from stock. We aim to provide customers with a made-to-measure product. One of the reasons we are able to do this is that we maintain control over the complete production process.
